WINDOW WASHING PAYLOAD

Upgrade To **SHERPA WITH A WINDOW PAYLOAD**

The Sherpa Drone with window washing payload is the ultimate solution for window cleaning professionals. Safely from the ground, giving you a streak-free and spot-free shine every time.* With just a push of a button on the remote control, you can wash, rinse, and repeat on demand.

*If Using Lucid Clear & DI Water

SAFER

With Sherpa Drone, you can stop climbing lift equipment, hanging from ropes, and worrying about expensive anchor systems. With Sherpa, you can clean windows from a safe distance, reducing the risk of accidents and injuries. Lower your liability and increase your ROI all at once.

LABOR SHORTAGE

Exterior window cleaning has been facing a labor shortage, and businesses are struggling to find dependable workers willing to do this dangerous, dirty, and time-consuming task. Lucid's Sherpa Drone provides an efficient and cost-effective solution to help businesses tackle these issues and get the job done right.

PROTECTS WINDOWS

Just like no one wants to look out a dirty window, no one wants to look out a scratched window. Using the Sherpa Drone and window-washing payload is a touchless process by using pressure to create agitation and Lucid Clear to leave a spot-free, streak-free shine.

01.

ONBOARD CHEMICAL TANK

Our onboard chemical tank with a variable mix ratio means your cleaning solution is on the drone, not your water supply. This allows you to separate your cleaning solution from clean DI water.

03.

EASY ROI

Prepare to see a rapid return on investment with our window-washing payload. You'll be able to complete more jobs in less time without sacrificing quality or safety. It's a game-changer for commercial window washers or anyone wanting to become one.

02.

LUCID CLEAR

Our window wash solution, Lucid Clear, is the perfect solution for sparkling clean windows. Leave windows with a streak-free shine without every touching a single window ever again.

04.

WASH & RINSE ON DEMAND FROM THE CONTROLLER

Control the Sherpa Drone from the ground, watching it fly up to those hard-to-reach windows, and effortlessly spraying them down with its window washing payload. No more worrying about anchor systems or paying for expensive equipment rentals.
